

Egg Carton Spider:

You will need:

- an egg carton
- googly eyes
- scissors
- pipe cleaners
- colored chalk
- felt tipped pens, or colored pencils.

Take one segment out of the egg carton. Make four incisions on the sides of the box with cutters. Attach a pipe cleaner into the incisions and twist them to form spider legs. Now take a pencil, felt tipped pens or colored chalks to pencil in a face of a spider.

Haunted Gingerbread House

You will need:

- frosting
- food coloring (optional)
- graham crackers or gingerbread
- various candies
- Halloween candies

Open the candy canes and red and green will be your candycorns, black and orange candies will also correspond to our holiday. Children will probably need your help to bring their house using frosting to glue the graham cracker or gingerbread (if you decided to make one) together into a house. It is possible to pre-dye white food coloring orange or black. Next step children would add sweets and candies every place they choose on their house trying to make it scary but tasty. You may leave the house plain and add candy when you back home from trick-or-treating.
